

DRNet[®] Update für GTUG

April 27, 2021

Craig Lawrance, EMEA Sales

The Company

- Privately held, 36 years
- Pioneered NonStop Data Protection (***DRNet***[®])
- Data and Support Centers in USA and Ireland
- Lowest Total Cost of Ownership
- Direct Support

DRNet[®] Solution Suite - 2021

- “All about NonStop Data!”
 - Replication, Integration, Distribution, Transformation
 - NonStop centric - Physical and Virtual (vNS)
 - NonStop to NonStop/ to and from NonStop
 - NonStop to Business Intelligence via JDBC or JSON “DRNet/Vision”
 - NonStop to Data Lakes, Warehouses via JDBC/JSON “DRNet/Vision”
- Partner solutions – FileSync, FS Compare/Repair, Fast Backup/Restore
- Direct Support

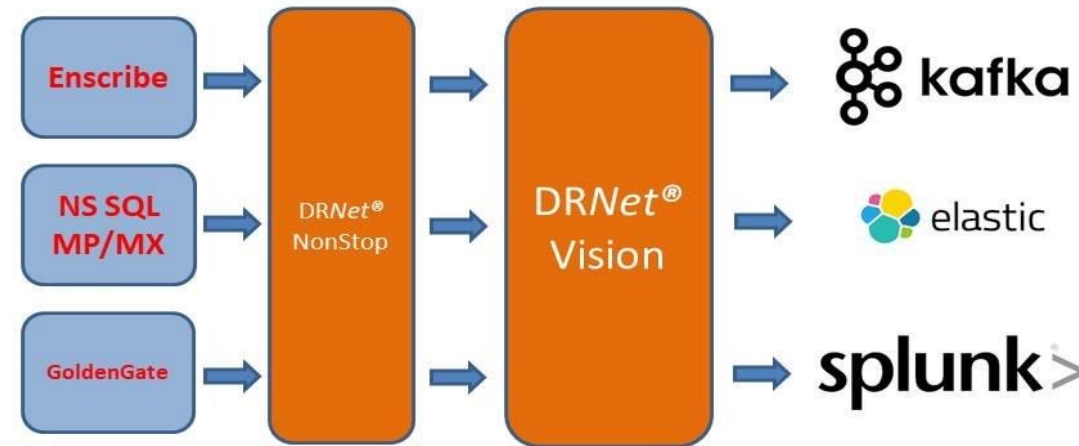

DRNet[®] Vision

- Integrate valuable NonStop data to Analytic/Data Warehouse Platforms
 - HPNS data, metadata
 - Easy Data Integration via JSON
- Field/Column Selectivity to Eliminate PCI Complications
- Agnostic Platform Support via Java
- Send Only the Data that Matters
- Inexpensive
- POCs easy to arrange

Delivering NonStop data to Kafka, Elastic, Splunk, Hadoop, elsewhere...

Recent Roadmap Successes

- *DRNet*[®]/*Vision*
 - Added JSON capability
- vNS ready
 - 2019 First HPE Partner
 - Customers acquiring vNS 2021
- vNSaaS
 - 2020 built first backbone
 - Supplemental Line of Business
- New Sales and Support Partnership (2021)
 - Concerto Software and Services

As we speak.....

- Enhancing *DRNet*[®]/Vision
 - Measure, EMS, etc,.
- Finishing website modernization
- Moving to Subscription investment model
- Considering HPE Showcase

Partner Solutions from TANDsoft

- FS Compare/Repair 3.0
- FS Backup and Restore
- FS FileSync
- Easy to Evaluate!

DRNet[®] FS Compare/Repair Rel 3.0

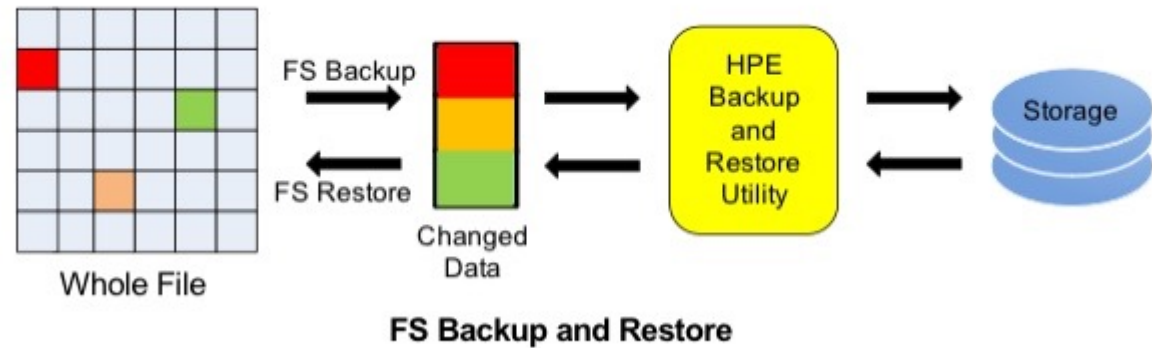

- **Fastest** Application Database Compare/Repair Solution
- Physical and Logical Block Level Comparison
 - Only changed blocks
- Supports Active Database
- **Avoids FUP Reloads**
- Enscribe, SQL/MP and OSS support (SQL/MX coming)
- Block and Record Level Difference Reporting
- HPE NonStop server fundamentals:
 - parallel processing, file selection by wildcarding & qualified expressions
- No Application Changes

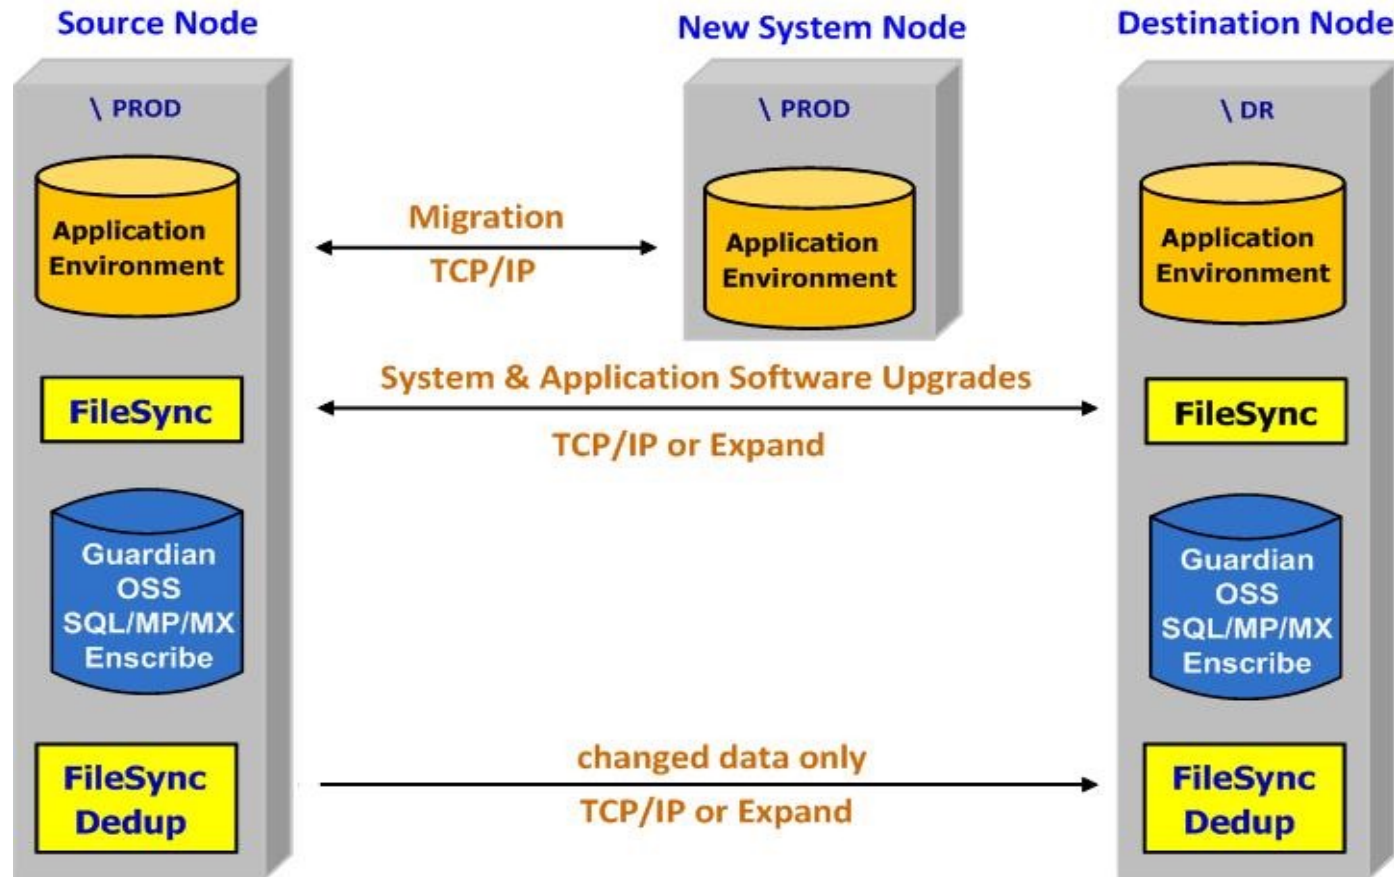

DRNet[®] FS Backup-Restore

- Complements HPE NonStop Backup and Restore and Backup and Restore 2 utilities
- Extremely efficient and fast by sending ONLY changed data blocks upstream to the HPE Backup utility
- Supports Guardian files, SQL/MP tables (same as HPE Backup and Restore) and OSS files (same as Backup and Restore 2)
- Incorporates NonStop server fundamentals:
 - Fault-Tolerance, Parallel Processing, File Selection by Wildcarding & Qualified Expressions

DRNet[®] FileSync

Summary

- NTI committed to NonStop
- Enterprise replication solution from single vendor is important
- Direct support always better than indirect support
- We wish you and yours safety and good health during this pandemic!

Vielen Dank!
