### **Speaker**

Hamman Ferreira, BankservAfrica

### **Title**

Building mutual digital infrastructure that connects economies by utilizing proven robots technologies

### **Speaker Biography**

Hamman Ferreira is a ground breaking technology expert with hands on industry experience. His strategic and business insight catapults businesses forward and inspires colleagues and team members alike.

As current Chief Technology Officer for BankservAfrica, he is uniquely poised to set the tone and create the South African payments landscape for the future. Through his visionary awareness and usage of appropriate fit for purpose technologies, the implementation of payments for the future is about to become reality.

With more than 25 years of thorough practical experience in numerous industries, Hamman finds himself in the unique position of having strategized and implemented technology solutions for some of South Africa's cutting edge, blue chip organisations. He has proven mental agility and innovative dexterity in the fields of banking services, mining and manufacturing and even the vehicle tracking and recovery industry. As a prolific entrepreneur, he also provided strategic, consulting and operational development services for a large mining organisation early on in his stellar career.

Hamman is a highly respected leader and mentor with the unique ability of identifying and cultivating unique talents in teams of people. His calm and level headed demeanour with grace under pressure provides a pragmatic and inclusive leadership style that encourages team members to volunteer solutions and present new ideas.

At BankservAfrica, he has now been given the opportunity to utilise his entrepreneurial flair in technology and operations while providing mentorship, support and technological solutions to the unique and critically important payments landscape. Through the creation of a Mutual Digital Infrastructure that connects economies, he is contributing greatly to the advancement of the South African economy and its growth.

Hamman is an authoritative orator with the ability to convey his extensive knowledge and passion for information technology in a straightforward and understandable manner. Having recently spoken at multiple global and local events, and being featured as one of the experts in "The Cube" at VeeamOn in New Orleans, his profile on an international stage is gaining great recognition in the industry. He has been a pivotal contributor in reigniting the HP Non Stop community in South Africa and has also spoken about BankservAfrica's new relationship with Veeam ware as technology partner. Locally, he has shared his knowledge and experience at numerous industry leading events.

He has the ability to convey the complicated nature of technology and operational solutions in an accessible way while inspiring thought leadership and creativity in solving the issues of the day. Hamman is an authoritative and eloquent addition to any speaking platform.
