Title

Digital Resilience (Protect your precious data and have a credible plan to recover in case of a Ransomware attack)

Abstract

Recent trends in Cybersecurity has necessitated the need for not only protecting your IT environment using strong security measures but also have a strategy to recover your data and be back on business in the unfortunate event of a successful ransomware attack. This talk describes how HPE enables you to implement an effective Digital Resiliency solution for your HPE NonStop environment and comply with regulations such as DORA.

Speaker

Prashanth Kamath, HPE NonStop Product Management
